September 12, 2014

Dear Professor Desgreniers,

Please find enclosed my work term report for my second CO-OP semester (PHY3907) which I partook in from May 5 to August 29, 2014. The work term followed my completion of the coop term T1.

I spent my work term at the uOttawa Physics Department as a Researcher in computational neuroscience. My supervisor was Professor Bela Joós.

The title of my enclosed report is *Computational Neuroscience and Fiber Loss Simulation at uOttawa*, and in it is a description of the work environment, an overview of the research project I participated in, and a report of the work I accomplished during my work term.

The report is a product of my own work, and was graciously reviewed by my supervisor Professor Bela, who provided me with feedback and suggestions for improvement.

Yours sincerely,

Mohammed Afif Chamma
